

Date	05 July 2026
Team ID	XXXXXX
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	S adivishnu	Text-based Emotion Detection using BERT to identify emotions such as Confused, Frustrated, Curious, Confident and Stressed.	Emotion Detection	G1
2	M.pavan	Personalized AI Learning Support using Gemini that first provides reassurance to students and answers only if the teacher does not respond	Learning Support	G2
3	S.adivishnu	Teacher Dashboard to visualize class emotion distribution, learning pain points, frequently asked doubts and most confusing topics.	Teacher Analytics	G1
4	m.pavan kumar	Student Learning History to track emotion timeline, progress and recurring learning challenges for personalized support.	Learning Analytics	G2
5	S adivishnu	RAG-based Knowledge Retrieval using class notes, previous discussions and study materials to generate contextual responses.	AI Enhancement	G1

6	M.pavankumar	Smart Doubt Clustering to group similar student questions and notify teachers about common learning difficulties	Learning Analytics	G2
---	--------------	--	--------------------	----

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
-----------	------------	-------------------------------	------------------------------	----------	-------------------

1	Text-based Emotion Detection using BERT	High	High	High	Yes
2	Personalized Learning Support with Gemini and RAG	High	High	High	Yes
